

Stay Cool!

Kerrits introduces the Channel Rib Pocket Tight.

Kerrits Equestrian Apparel introduces their new Channel Rib™ Pocket Tight. This tight is ideal for summer when temperatures rise. It's ultra lightweight, moisture wicking and more controlling than a traditional tight.

The Channel Rib Pocket Tight is a great option for any rider. "It's just so comfortable" says team rider Jessica Henderson but a bit more formal than everyday tight with no no show two flat pockets, flat belt loops and creates cut flow like you want.

Kerrits exclusive Channel Rib™ technology means that the rib is flat and worked on the low side to help keep you cool and includes compression knit on the high side to hold like a girdle and smooth skin. With its unbreakable vertical lines the tight is sleek and helps to elongate the look of the leg.

"Riders want to be cool and comfortable but many are not comfortable wearing a traditional tight. Owner and Designer Kerr Kerr set out to create a tight that allows for breathability but has a compression fit. "Women will feel much more confident wearing our new Channel Rib. This tight holds like a girdle and helps smooth the skin."

Visit www.kerrits.com for more information on the new Channel Rib Pocket Tight.
