SECURELY HITCHED

The Defender™ is a unique gooseneck trailer coupler with built-in security features and extreme ease of use to help keep your property safe and ensure easier towing. The integrated push-button keyed lock is an effective theft deterrent, whether coupled or uncoupled. The cone-shaped coupler provides a wider hookup target, and the automatic latch mean you simply line up the ball, drop the trailer, and you're on the road.

For more information about the Defender™ or to find a dealer near you, visit B&W Trailer Hitches at www.turnoverball.com.

THE RETURN OF THE CARGO TIGHT

Say goodbye to bulky pockets with Kerrit's popular workhorse breeches, the Cargo Tight. The durable, flattering riding tight features tons of mobility, "tacky" knee patches for better grip and invisible side pockets. This built-in construction provides a close fit, adding security to riders' carry-on items such as iPhones, which perfectly fit and won't slide out.

Originally introduced ten years ago, Kerrits' newly-revamped Cargo Tight integrates WickTek™ fabric for stretch, mobility and moisture-wicking performance to keep riders dry. The new low-profile waist flips up for working around the barn, then down when you're riding. Available in charcoal, kale and black.

Ask for Cargo Tights at your favourite tack shop, or go to www.kerrits.com.

STOP THE REIN

The new Easy-On Rein Stop™ is a modern twist on an old standby. Unlike traditional rein stops that are difficult to get on, these pop on in seconds and can be removed just as easily. Hand-made from fine English leather, they are available in four bridle-matching colours. The four dot fasteners come in a range of colours, metallics, and Swarovski crystal jewels for a pop of personality. Available in two sizes. For information, go to www.KoperEquine.com or www.facebook.com/KoperEquine.

CONVERTIBLE TRAILER

Featherlite Trailers offers a functional, convertible aluminum three-in-one horse trailer that easily converts between a straight load, slant load, or recreational/utility trailer. The Model 9401 bumper pull two-horse trailer features a movable divider with slam latch to easily switch between the slant load and straight load configuration. Add the optional ramp package, and the trailer can haul an ATV, lawn mower, golf cart or other cargo.

For more information on any of Featherlite's horse trailers, visit www.fthr.com/tnews.

THE NEXT GENERATION OF SADDLES

JPC Equestrian has introduced a new generation of Henri De Rivel (HDR) saddles. Ten new saddles across all disciplines were created using Adjust-to-Fit technology to guarantee a perfect fit on any horse. An easy-to-use, interchangeable gullet system minimizes rubbing on the horse's shoulders to allow for more freedom of movement. Superior, soft leather has been used on the flaps and the newest covered-flap models feature soft, grippy leather throughout the entire saddle, allowing instant break-in and exceptional comfort from day one.

To view all the HDR models and JPC Equestrian products, visit www.breeches.com.
